**Re: Receipt of Funding – Joint Grant Application for Port Burwell Area Secondary Water Supply System (PBASWSS) Rehabilitation Project**

In 2025, Bayham collaborated with the Township of Malahide and the Municipality of Central Elgin on a joint grant application to the Municipal Housing Infrastructure Program – Health and Safety Water Stream (MHIP/HSWS) for the rehabilitation of approximately 7 kilometres of PVC watermain and sections of the original pipeline, along with key system upgrades. This critical infrastructure initiative will replace and modernize high-risk components of the jointly-owned regional water transmission system to provide a continuous safe potable water supply to residents, improve pressure, system reliability, enhance fire protection, and improve long-term performance.

Bayham acknowledges the Province of Ontario's support for this project. As the administering municipality on the PBASWSS, Malahide will be receiving \$15,330,000 to support this \$21,000,000 project shared between Bayham, Malahide, and Central Elgin. This funding will advance a major capital project that supports over 3,000 residents across our three municipalities. These improvements will strengthen water quality, enhance fire protection capacity, and reduce the likelihood of system failures in environmentally-sensitive and developed areas.

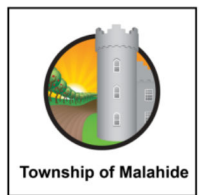

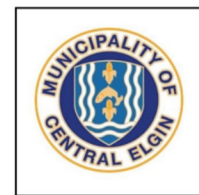

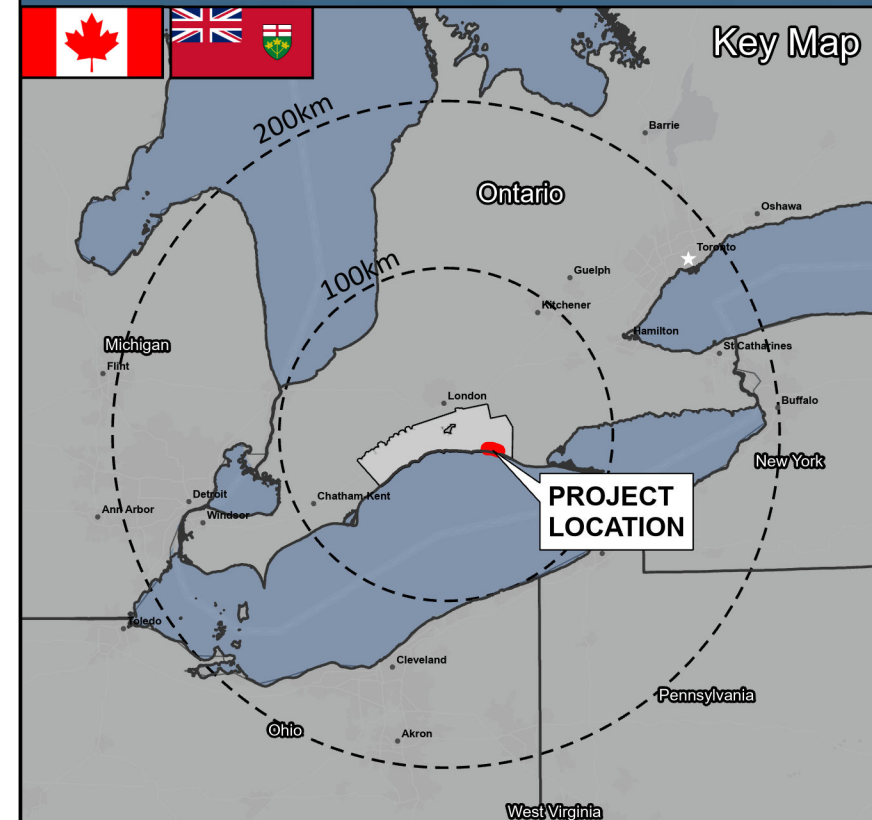

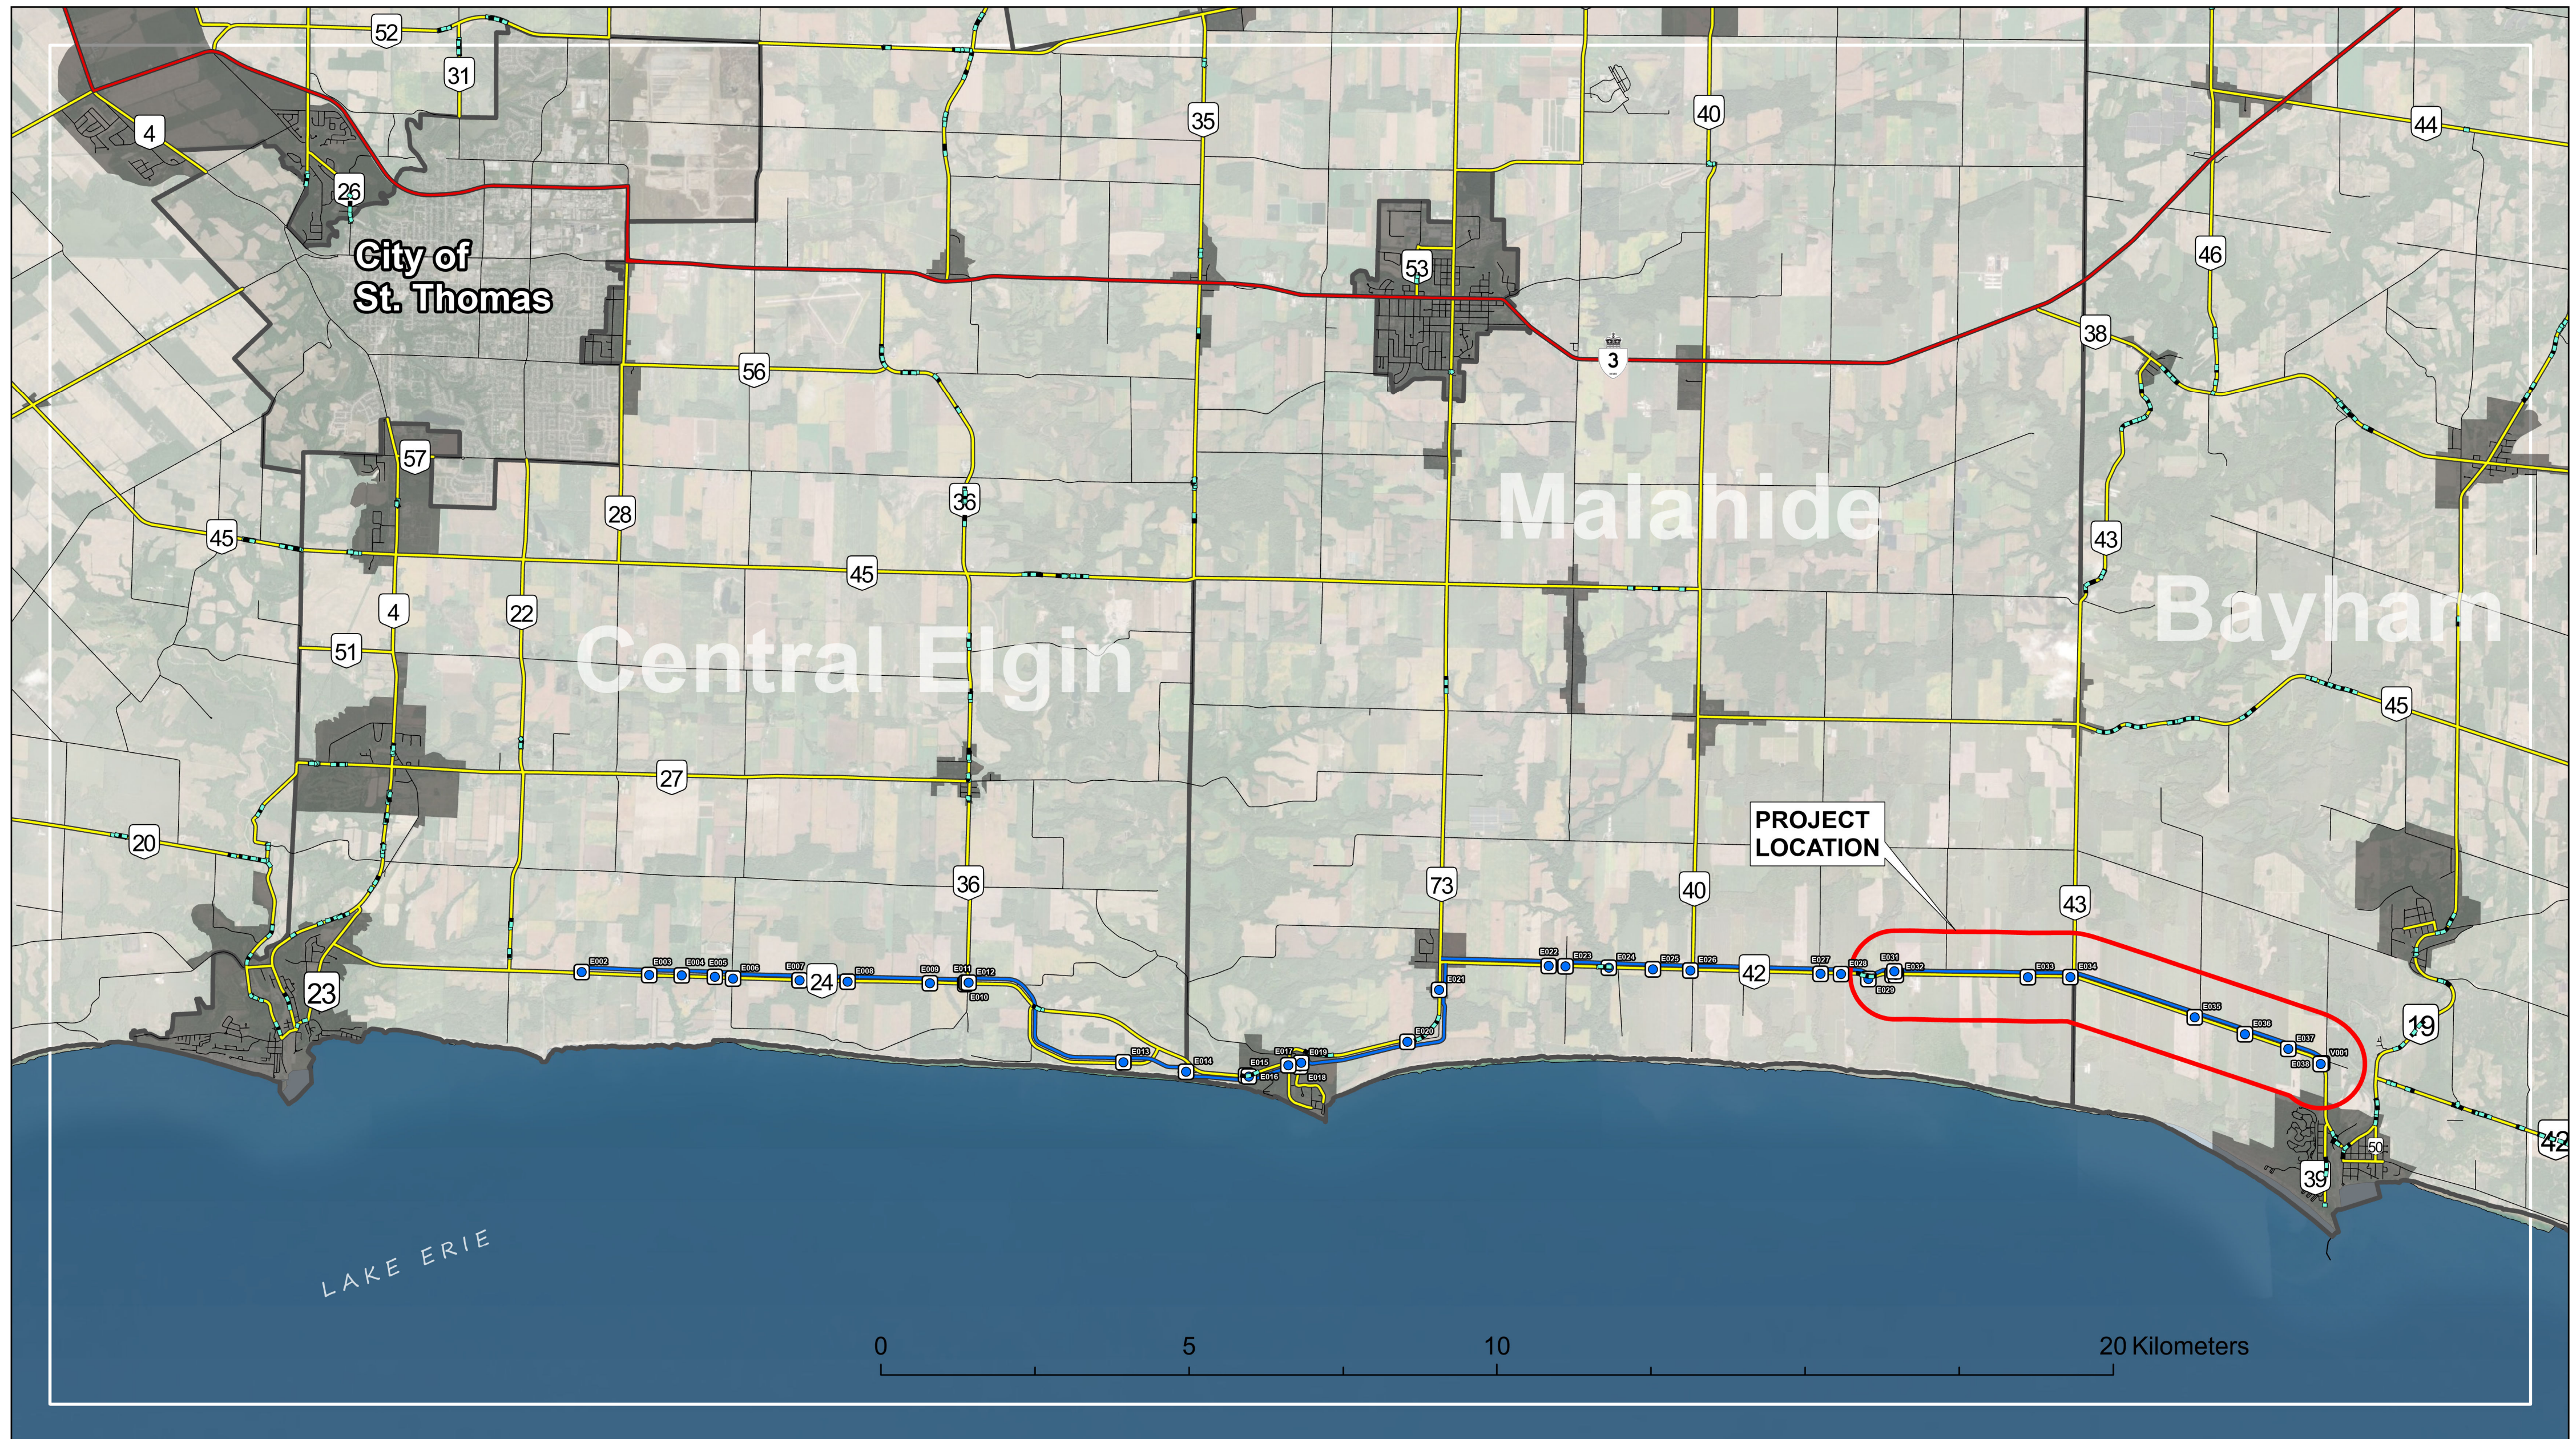

As the primary purchaser of water from the PBASWSS, Bayham will receive approximately \$9,000,000 in benefit from this joint grant funding.

Bayham is proud of this collaborative venture and thanks Malahide staff for their leadership on the application process.

Thank you also to the Ministry of Infrastructure and all partners involved for supporting this essential investment in the future resilience of our communities.

Municipality of Bayham
