

## PRELIMINARY STUDY, DETAILED DESIGN, AND CONSTRUCTION OF SLOPE FAILURE AREAS

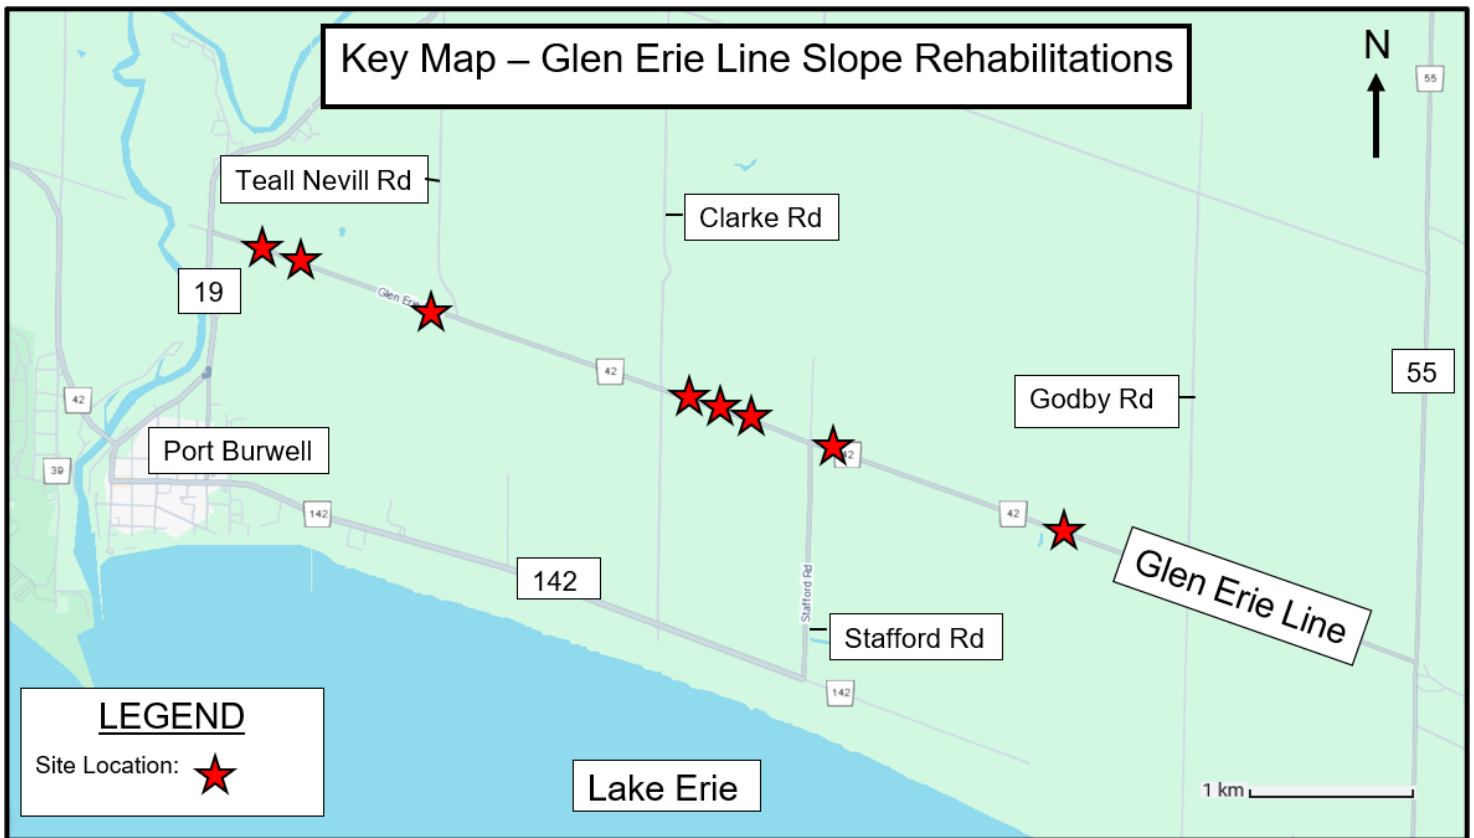

### Glen Erie Line, Elgin County, ON

#### THE STUDY

The County of Elgin has retained the services of Planmac Engineering Inc. to undertake the design for the Rehabilitation of Slope Failure areas, as were identified during background studies. The subject locations are shown on the below Key Map.

#### THE PROCESS

Works will include an engineering analysis of each of the Eight (8) identified areas to determine the best-fit solution that fits the needs of the County, satisfies design and safety standards, and minimizes the financial cost and potential impacts to landowners and the environment. Engineering activities are planned to continue through spring of 2025, with construction of the slope areas beginning in the early summer of 2025 subject to necessary approvals.

#### COMMENTS AND INFORMATION

The purpose of this notification is to advise you that our engineering team will be in the area gathering engineering survey data, and undertaking tree assessments and inventories. If you have any comments, questions, or concerns, please contact one of the project managers below:
