Date: April 4, 2025 **TIME:** 4:00 PM
To: Municipal Flood Coordinators, LPRCA, SWMC, Media
From: Paul Gagnon, Lands & Waters Supervisor
Subject: **Watershed Conditions Statement – Flood Outlook (Event Message #3)**

The Long Point Region Conservation Authority is terminating the Flood Watch message previously in effect and is issuing a **Watershed Conditions Statement—Flood Outlook** for the entire watershed. Although most watercourses have peaked and flows are now dropping, the elevated stream flows along with the forecasted precipitation tonight and tomorrow morning will cause watercourses to remain high into next week.

People are advised to stay away from ditches, water bodies, streams, rivers, and ponds, as the combination of slippery banks and fast-flowing water is dangerous. Landowners are also urged to ensure that dams, culverts, and catch basins are free of debris and functioning properly, provided the work can be done safely.

This **Watershed Conditions Statement – Flood Outlook** will remain in effect until **4:30 PM on Monday, April 7, 2025**. LPRCA staff will continue to monitor the forecasted conditions and will update this message as necessary.

Contact Paul Gagnon, Lands & Waters Supervisor at lprca.floodmessage@lprca.on.ca or 519-429-4899 should further information be required.

Note: Watershed Conditions Statement – Flood Outlook: Early notice of the potential for flooding based on weather forecasts calling for heavy rain, snow melt, high wind or other conditions that could lead to high runoff, cause ice jams, a rise in Lake Erie, lakeshore flooding or erosion.
